Comments: Ebikes are motorized bicycles. It doesn't matter how fast or slow they go, how quiet they are, they are still motorized and should not be exempt from non-motorized status! It is so very simple and clear. Non-motorized vehicle areas/trails/waterways need to be protected to insure the sanctity of that designation. Motorized vehicles have many more places and much more area to be enjoyed than encroaching on non-motorized areas. This would be akin to allowing electric trolling motors in non-motorized lakes, rivers or streams. Do not allow this to move forward.
