Comments: I would like to strongly suggest that the USFS follow the classification system that has been implemented by the Dept of the Interior for NPS and BLM lands.

Ebikes are NOT like comparable to other motorized vehicles like mopeds, ATVs, UTVs, etc. Ebikes have their places on the trails that already allow bicycles. There is no evidence that they harm the trails any more or less than conventional, human powered bicycles. I strongly suggest that trails allowing bicycles be allowed for use by ebikes. It allows for those of us with physical and age related disabilities to once again enjoy mountain bike riding.
