Comments: Please do not allow e-bikes on additional trails and access points in the national lands managed by the BLM, USFS, and other agencies.

As someone that utilizes a traditional mountain bike to access remote areas via gated or closed roads, I strongly oppose any changes to current rules that would allow electronic-motored bikes to access additional areas. These machines are loud, intrusive, and have the additional downside of potential pollution from broken or damaged batteries.

In this day of increasing obesity and poor health, the population should be encouraged to increase their fitness levels by walking, hiking, and biking, but not in ways that utilize motorized equipment and diminish the experience of others not utilizing the same equipment.

Thank you.
