Comments: Hello,

I am writing to express my strong feelings against use of e-bikes or any motorized vehicles on any forest land. This land is precious and needs to be reserved for wildlife and limited human use. E-bikes are wonderful for city dwellers who are helping to cut carbon emissions and as a way to lessen traffic. They have no business in our forest lands, national parks, or other pedestrian trails. As an avid hiker in national and state forests, I strongly oppose the admittance of ebikes which often move at high speed and detract from the beauty of nature. Thank you.
