Last name: Ottesen

Organization:

Title:

Comments: E-bikes are motorized and thus should not be allowed on non motorized trails and for sure not on multi use trails. I am a horseback trail user and non motorized bikes are dangerous enough on shared trails when Bike riders can't be heard coming up behind a horse unless riders warn verbally or ringing of a bell. Horses can deal with approaching sounds better a surprise biker about to pass.

Please do not allow on horse trails.
