Comments: PLEASE help preserve our land and wildlife, which in my opinion are this state's greatest assets. Corrupt individuals are seeing HUGE tourism dollars with this proposal, but we MUST NOT sell out! It is bad enough that we are being flooded with out-of-staters seeking escape from covid by moving here. Every day, I see more litter on roadsides, disregard for our land and water, and all the evils of overpopulation. E-bikes will only worsen this trend. The same people who are too lazy to actually hike or bike are also too lazy to take the necessary precautions - which require EFFORT - to keep land clean. Garbage will accumulate. This will draw our wild animals closer to towns. Trash will get tossed into our lakes and rivers. Lazy people pose a real threat, and ebikes will bring them here in droves.
