Comments: I am NOT in favor of allowing e-bikes on non-motorized trails.

1) I am an equestrian. Horses are easily spooked. We already have to deal with hikers, mountain bikes, and fishermen.

2) E-bikes are silent, so you don't usually know they are around until they are on top of you. Some e-bikes can reach 30 mph, and I'm sure that speed will increase as technology improves. I believe it to be extremely dangerous to everyone on non-motorized trails.

3) There are already many existing trails that allow regular bicycles. Far more of them exist than do non-motorized trails.
