Comments: Hello, thank you for considering my comments.

I am not in favor of expanding areas ebikes are permitted for transportation & recreation.

There are already plenty of places where people who want to ride these e-bikes may do so; there is a certain peace & serenity in public lands where motorized transportation is not allowed. I believe that allowing their use in more and more places will only lead to them being A) allowed in more places, B) confusion over rider's understanding of where they can & cannot ride them, C) adverse impacts to those who recreate non-motorized.

I would, however, be supportive of special use regulations that allow those that wouldn't be able to otherwise access or transport (similar to a handicap parking permit) be able to apply & use. I do not think these motorized machines should be allowed en masse on areas where motorized transportation is not currently allowed.

Please do not open up NF trails to e-bikes!
