Comments: ANY type of motorized vehicle on non-motorized trails should not even be considered. Who is going to be out on these trails enforcing what level of e-bike is there? This is not in fairness to those of us, including wildlife, who enjoy the peace non-motorized trails bring us. Oh please, HELL NO to any motors invading our last semi-natural experience! Have you considered the liability (the FS I presume) when one of these bikes, above the allowable level most likely, gets its spokes entangled with my horse's hooves?
