Comments: Many horses act in a fearful way when they are near motorized vehicles even if they are quiet. They have the fight or flight instinct. Allowing e-bikes may cause serious fear in the horses and mules which may cause serious injury to the riders. Please do not allow this to happen. It is not fun when you are on a scared horse running out of control, bucking from fear or spinning around so fast to get away the rider is thrown off. Please think of the consequences.
