Comments: Bicycles have already ruined many hiking trails I use in Coconino National Forest. They are not for the most part courteous, instead I have to stop and get off the trail when they come whizzing by. Half of them say thank you, rarely do they yield to me. I'd prefer there be trails separate for hiking and biking. E bikes would only exacerbate this dilemma so instead we will have people with ATV mentality zipping down trails. I see greater possibilities of collisions with hikers and bikers.
