Comments: E-bikes on non motorized trails should not be allowed. They have motors, so should not be allowed. Trails for pedal/human powered mountain bikes should not be re-classified to allow e-bikes. Perhaps if someone needs an exception due to a physical condition a special permit could be issued but should generally be discouraged. E-bikes should be managed differently than traditional non motorized bicycles. E-bikes can ride on roads which allow motorized travel and/or trails which allow motorized travel. Do not allow lazy people to take e-bikes into places they should not be.
