Title:

Comments: My family and I are avid public land users. We have hiked, fishing, hunted, biked and my wife has even rock collected on allowed lands. I am 100% for allowing more opportunities for people to use public lands. However e bikes, should be treated as a motor vehicle. They should follow the same regulations as other similar sized gas powered vehicles, like dirt bikes or segways. Public lands are special places, we can't love them to death. And that's what e bikes will help do, make wild places less wild. Open up more areas to human pressure and effect wildlife. E bikes are a horrible idea for public lands. They are a motorized vehicle.
