Comments: I am 73 years old and recently changed over to a pedal assist bike. This change has allowed me to ride every day, weather permitting, since having both my hips replaced. I am not able to run anymore and my pedal assist bicycle allows me the opportunity to exercise that I otherwise would not have. It has improved both my legs and my cardio and I enjoy riding in the state park where I don't have to worry about automobile traffic. I do my best to respect others on the trail as I realize it is their park too. Please allow those like me to continue healthy riding and enjoyment of our parks.
