Comments: I am a horse back rider, & I have had several problematic encounters with bicycles who wer going to fast on a downhill trail. In one of them my horse spooked, I was thrown off, & was injured. I no longer go to Annadel-Trione Park on weekends because of that. There are lots of bicycles in all the parks on weekends. At least with regular bikes, one knows they are going slow going up-hill.. When e-bikes hit the trails there will be that much more traffic, & they will be going faster up-hill. I am concerned that with much more bicycles on the trail, there won't be any room for us horse-back riders.
