Comments: Ebikes are a reality and make the outdoors and the sport of mountain biking more accessible. We should allow class 1 mountain bikes on all mountain bike trails and class 2 and 3 on a smaller set on a case by case basis. I ride a non electric bike and I've seen plenty of people on ebikes around the king county area, without listening or looking real close it's hard to tell them apart in the way they ride (unless they're beating you up a hill).

I want more people to enjoy the outdoors and do so legally. If there are concerns about more usage on the trails, perhaps an ebike tax going to the Forest service could help.
