Comments: I would specifically request that eBikes not be allowed on trails with hikers and equestrians. Bicycles and horses, specifically, have a difficult time sharing trails, as bikes tend to travel at much greater speed than horses, and they can also cause horses to spook and dangerous conditions can occur. While eBikes may do well with bicycles, they will not mix well with equestrian riders or hikers. I am an advocate for an every other day system, where bicycles (and perhaps eBikes) would use trails on even (or odd) days, and equestrians and hikers would use the trails on the opposite days. I have long advocated for such a system and I believe that is the way we can all share the trails we love without endangering or frustrating the other group. I appreciate the opportunity to share my thoughts!
