Comments: To whom it may concern,

In regards to the possible directive change FSM 770 and FSM 7710, I Would respectfully request that the addition a E-bikes on non motorized trails on federal land be denied. As an equestrian and hiker I search out non motorized trails to adventure on. Motorized vehicles and horses do not always mix well. I also feel that we need to preserve natural space. If E-bikes are allowed it won't be long before dirt bikes and other off road vehicles will be allowed. It is a very slippery slope. Please let there be trails we can frequent without the fear of motorized vehicles.
