Title:

Comments: Please do not allow ebikes on trails. They damage the trails, and they move at speeds which endanger hikers and frighten wildlife. On trails where equestrians are allowed they can cause a dangerous flight response in a horse. Many natural trails do not allow other motorized transport and equipment because it spoils the natural experience and impacts wildlife. Ebikes do as well. Please keep our trails a safe, natural, peaceful experience and a low impact home for wildlife. Do not allow ebikes.
