Comments: I am an equestrian rider and packer that uses Wilderness areas National forest, and state areas in multiple states. Please do not approve any form of electrical or motorized bikes on the trails. It is my personal experience that Mountain bikers are speeding and traveling way to fast for others safety anyway. I have had multiple encounters that have caused the bicyclist harm or my mount by being hit or almost hit. Adding electric versions adds another whole set of fast moving obstacles for other trail users to negotiate and avoid.
