Title:

Comments: I live next to forest service and would love to see more people enjoying the trails on e bikes. People are blowing the impacts out of proportion. Horses are more of a nuisance than bikes. I think they are small enough and similar enough to bikes that they deserve a special category and exemptions from being treated as strict as traditional motor vehicles. No noise, no fumes, the future will be awesome. Let's not ban something that will bring so much benefits to the public.
