Title:

Comments: Please do not allow motorized e-bikes on any trails that are designated non-motorized. As an equestrian who rides many miles each year in the wilderness and other Forest Service Lands, I consider it very dangerous to be exposed to the possibility of a silent, fast moving e-bike of any class approaching me and my equine on a mountain trail. I consider this to be extremely hazardous. E-bike have an appropriate place to be used and Forest Service Land is not the place. Thank you.
