Comments: I'm an American citizen living in France. I have seen the rise in ebike Mountain Bikes and it's brought great pleasure to me seeing them in the mountains. Families and older people being able to get out and enjoy the trail together.

Ebike MTB's are only electric assist. They aren't scooters or motorcycles where no pedaling is required. They should be allowed on all trails that currently allow MTB's. All they do is make it a little easier and a little more enjoyable for those wishing to get out and enjoy nature on the trails.
