Comments: E-bikes should not be allowed on presently non-motorized trails. The reason many choose to bike or hike on non-motorized trails is to enjoy the slower pace that comes with using human-powered means of transport, and e-bikes are essentially a moped. They can ride the roads with other vehicles, but if being powered by something other than a human body, should not be allowed to destroy the peace that comes from our choice to use a slower path.
