Title:

Comments: Please do not allow ebikes into the National Forests! They are too fast and disruptive to wildlife and horseback riders, and could even pose a threat to bike riders because they may be going too fast and crash into a bicycle. They will also usher in to existence the ability to use electric golf carts and like vehicles. Horses will be spooked and this will cause bad horse wrecks. Bicyclists are very friendly on the trail. I believe the ebike people and their speed will not be so friendly! This is a Natural Forest, there is no place for electric bikes here!
