Comments: As a frequent user of these trails I would NOT want to have an incident with an ebike on the trail. I cannot imagine the danger involved with meeting one of these on a switch back ledge in the Badlands while riding my horse. I have ridden many different states and regions and do not wish to see ebikes allowed on the non-motorized trails. I believe allowing these access to non-motorized trails will lead to many more accidents in secluded areas difficult to access with emergency vehicles and for emergency responders. This is a very bad idea! I have been riding horse over 50 years and do not wish to see this happen as there will be a lot of trails I won't be able to ride safely any more.
