Comments: It is time to recognize that e-bikes are here to stay. They do less damage to trails than a horse and are equal to a regular bike. They have many health benefits for those would need encouragement to get out and exercise. The current laws forbidding e-bikes make no sense and should be changed. I would suggest those making the choice to allow or disallow should take a ride on an e-bike and judge for themselves! Please open the forest for all levels of riders to enjoy!
