Comments: I do not think e-bikes should be allowed on non-motorized trails. This will take away from the peace and quiet that I search for when I'm out on trail. I'm soon moving to Colorado and do not want to see the trails covered with even more people on more vehicles that I have to avoid. I also believe that the use of the bikes will add to the wear on trails. I'm also concerned that folks might go off trail with them and cause other damage. Please do not allow e-bikes on non-motorized trails. Thank you.
