Title:

Comments: I am a very avid mountain biker and have been biking for 20 years. Please consider e-bike to be motorized. E-bike are not the same as standard mountain bike as they are much faster. It is also very hard to tell the difference between an e-bike and an electric dirt bike. E-bikes and e-dirt bikes have only been available for a few years and they are already blinding, if you allow e-bikes on a trail you are essentially allowing dirt bikes as well. I propose to allow e-bikes on trails already open to motorized use but to keep human powered trails human powered.
