Comments: Please do not allow ebikes on horse riding trails. Many of these areas are remote and have small riding trails. Many horses are not accustomed to bikes and it can be dangerous if they are encountered on small trails that have limited places to pass. Not to mention a collision situation because of the amount of speed a bike can pick up coming downhill. How are they going to stop when they are traveling at a high rate of speed around a corner and meet up with a horse coming the opposite direction on a narrow trail???

This is a disaster waiting to happen. I'm shocked that the forest service is
Even considering it.
