Comments: I do not want trails that should be for horses or hikers to be opened up for electric bikes. They have plenty of options as far as where they can ride but for horses that's limited. Besides the fact that if someone is on a young horse or has a spooky horse like mine, he'd kill me. There's no scenario my horse wouldn't explode if you allow this to pass and we met a regular bike, much less an electric one. Please keep our trails protected for folks who wanna ride their horse without the fear of a wreck happening.
