Title:

Comments: Since ebikes are motorized, they should not be allowed on the mutinies trails that horses are allowed on. This would create unsafe conditions for horse riders. The noise even though it's not as loud as say a motor cycle, you know people will find ways to alter the bikes to be loader and faster. I have no problems sharing the trails with regular bikes. There are plenty of trails that horses are not allowed on that the ebikes could ride.

Thanks for your consideration!
