Title:

Comments: I'm do not want to see motorized bikes on trails. We ride horses and it's already bad,com8ng across hikers and bicycles on the trail. We used to enjoyed riding in the trails on horseback without seeing anyone. Now we have hikers etc. The motorized bikes would scare the horses and cause a lot of accidents., besides polluting streams and trails with oil and gas leaks. Enjoying the wilderness is about quite and nature. Motorized bikes would destroy the serenity of using trails. There are already places for motorcycles to ride on. They can use those trails.
