Title:

Comments: We ride horses throughout much of the central and western United States. We have had the pleasure of seeing our country and enjoying it's beauty. More and more the trails are being overtaken by motorized vehicle, especially 4 wheelers and side by sides. They travel quickly and scare horses. I fear that motorized bikes would do the same and eventually the restrictions will loosen more and 4 wheelers will be allowed also. Hikers and horses travel at a much slower speed and do less damage to the environment. I hope that the trails will be kept for that use.
