Title:

Comments: Please do not open non motorized lands to anything with a motor: that includes ebikes. As horseback riders the amount of places we can go is greatly being erased by people who can't respect leash laws, motorized use laws, and the growing population. We need places to go. The horse culture here has been a key component of life in the high desert forever. While I understand the need for more accessible trails, use your money and develop more trails. We cannot crowd horse trails with motorized vehicles and remain safe. People already act stupidly around horses on the trails.

As an aside I had a bike rider actually call out to his buddy that he'd "wreck my monster of a horse" if he had the chance.

They simply don't understand and they don't care if they endanger us and our animals in the process.
