Comments: I am against E-Bikes on the trail, as an equestrian using these trails the danger the E-Bike represents is extremely high. Reading through the literature I can see the rider will not be able to stop these bikes quickly setting up for horse and both riders to be hurt. Too many times on a regular mountain bike have I seen riders fly over their handlebars when wearing earbuds and not hearing riders declare they are present. I feel the purpose of all accessing the trails is to enjoy nature and not disturb it, how can someone riding at top speed enjoy the surrounding's?
