Title:

Comments: I believe allowing e bikes with motors on trails used by hikers, joggers, horse riders and regular pedal bikers will endanger other users and ruin the experience of being on the trails. I am not sure they are safe with off road vehicles, but they should be on roads or trails that other motorized vehicles use.

Our wilderness areas are already being overused. Adding e bikes will put additional stress on the wildlife(plants and animals) and interfere with other users. Not all new commercial ventures have a right to infringe on existing users and wildlife.

Please do not include e bikes on our trails.
