Comments: To whom it may concern,

I have read through the proposed actions for allowing e-bike use on nonmotorized trails in the USFS trail system. I support any proposal that is inclusive of new trail users, such as e-bike cyclists on class 1 pedal assist bicycles. I am opposed to class 2 and 3 e-bikes on any trails except those open to motorcycles. The review and approval process should be optimized to allow land managers to form policy at the largest relevant unit (area vs specific trail).
