Comments: Allowing e-bikes is taking away from the significance of being outdoors on a trail whether it's a traditional pedal bike, on foot or on horseback. The world becoming urbanized is sad. Let the places that do not allow motors of any type continue to stay that way. There are plenty of other places for people to ride e-bikes... leave the closed trails closed! The beauty of reaching places that take effort is what keeps places like wilderness and deep backcountry areas pristine and desolate- not overcrowded because a bunch of lazy people get to "cheat". DO NOT ALLOW E-BIKES!!!! A motor is a motor is a motor!!!
