Comments: I'm a beginner back country horsemen. This means that I chose trails that are easy for me to get to, and enjoy without having a wreck. I avoided trails with motor vehicles. This year because of COVID, hikers and bikes have increased in most of the locations that I ride. I don't have a problem with that. Most people are polite and step off the trail. E-bikes move a lot faster than a bike and hiker. On the trails, often times there is no room for passing or getting off the trail, blind turns. Allowing E-bikes will only get people hurt. Both hikers, bikers and horse riders. Adding e-bikes access to trails, will only push horse people out. Our back country horse men groups help manage most of these trails. Without horse people, you wouldn't have access to these trails.
