Comments: To whomever this concern,

As a avid horse back rider, I would like to live to see my grandchildren someday. Adding e-bikes to the trails is a lethal mix with horse riders. As much as we desensitize our flight animals to their surroundings they still can kill us and spook. We have to deal with bikers on the roads and everywhere else so when it comes to our hobby it would be nice to be able to enjoy our sport and have the opportunity to do it with out the worry of these bikes coming up behind us or in front of us and spooking our horses. I beg you to understand the horse community and that it's not that we don't like to share but it's for our safety, this is a terrible idea and I would like to enjoy my hobby that gets me into nature and calms the soul without the worry of possibility getting killed.

Please do not let these bikes on the trails.

My family will thank you for keeping us alive.

K~
