Comments: As a bike rider on the Mickelson trail, I have already encountered these electric bikes. They don't seem to pose a problem as they are quiet, not fast, and they allow people who could not experience the trail, to be able to enjoy it. As long as it's only e bikes, and not gas powered bikes, I have no opposition, as long as they follow biking protocol. However, I am opposed to off trailing of any kind of motorbike, as I would not like the environment damaged.
