First name: Roswell

Last name: Pontius

Organization:

Title:

Comments: Please do not allow e-bikes on the trails. They are motorized and are 70 pounds heavier than a regular bike. They also go much faster, upwards of 50mph in some cases, and a collision with a pedestrian will cause far greater injury. Too much mass at too high a velocity is a dangerous combination and will lead to devastating injuries. Furthermore these more serious injuries will occur deeper into the wilderness because of increased range leading to more difficult extrications, medical treatment, and worse outcomes for all parties involved. Please "Keep it Wild", no motors on those trails.
