Comments: Why? Allowing non-motorized bikes they're really really bad idea. why do you think you need to fix something that is not broken. I will just allow them to go faster and they're already dangerous. And the bike will be heavier and even more dangerous. Many bikers are just crazy on the trails. They speed around blind corners. We need less bikes not more on our trails. Most bikers are there for the thrill not to enjoy nature. Let's find other trails where they can have their thrills without danger in the General public! Thank you for listening.
