Comments: Most of us that ride Ebikes ride them because we are physically unable to ride regular bikes very far. They give us the opportunity to ride in places we could not get to without them. The majority of the Ebike riders are just trying to get healthy and enjoy the wilderness. If you look at our demographics, most of us are over 40 years old (I am 58, asthamatic recovering from a broken ankle) and we are not interested in riding fast, we are interested in riding far. I have been on many trails where I've been passed by younger riders on regular bikes who do not respect the hikers, this is not what you normally see with the Ebike riders. If you ban Ebikes from the parks, you are stopping a lot of senior citizens and physically challenged people from being able to enjoy the parks. The parks are for all of us, not just the young that can still ride a regular bike. Just make note of who you see riding regular bikes, it is a very specific demographic. Please allow all of us the same opportunity. If a biker is out of line the biker is out of line it does not have anything to do with the Ebike. Thank you.
