Comments: To whom it may concern,

My parents, ages 75 and 71, just purchased type 1 ebikes this year. They have been able to get out ride their bikes in order stay healthy. My parents have always enjoyed being outside and walking trails, but their knees don't hold up to walking like they used to. This is a great way to help our folks that may not be able to recreate on our trails otherwise. Can we please classify type 1 ebikes as non-motorized for trail access? I'd rather the folks that ride them get outside and enjoy the single track that we have in the Inland Northwest while simultaneously working on their health.

Thank you for your consideration,

-Kirt
