Comments: I've seen ebikers on trails that were restricted for ebikes. Then bike shops have been telling people they can ride them anywhere. This shows that ebikers and shops have no regard for the rules and restrictions. Then ebikes are able to take an average out of shape person and allow them to obtain speeds that are typical for a professional racer. This will cause trail conflicts to rise in the future. Your average person won't care if a mountain biker is on a normal bike or ebike, they will just want them banned.
