Comments: Thank you for taking comments on this divisive issue.

I have been mountain biking for close to thirty years. When electric bikes first came out I was as most MTB people were, apposed to them. Now that I am close to 70 years old I have begun to think about the end of my mountain biking! I had the opportunity to try an E-bike and my life has changed. No longer do I dread the end of my biking. These bikes will allow older, some may say foolish, older guys to continue biking. Please allow level one bikes access to all trails.
