Comments: I believe the development of e bikes to be of great value to all especially those of us over the age of 50. With my pedal assist (class1) eMTB, I would not be able to enjoy the many MTB trails available in CO and AZ where I live.

I would support a proposal that allows class 1 eMTB on non motorized trails, thus classify them as non electric bikes. This would allow all such non-motorized trails to continue to be so classified.
