Comments: I really think Pedal Assist bikes should be allowed on our trails. I have helped build trails, been riding MTB's for 30+ years now and I just hit 50. I have been hurt riding, as well as have back/neck issues and while not that bad (yet), I know some other bike lifers that have it worse, and there will be a day we all don't have the strength/ability to climb the mtn's like we once did, and these E Assist bikes really can help. Pedal Assist E Bikes are a great way for riders of all ages/abilities to get out and enjoy what we have all built and these bikes do not do any more damage to the well built trails of today than a "normal" pedal bicycle. Allowing these E Assist Pedal bikes will get more people riding, and people riding = a HEALTHY WORLD.
